

Bootcamp Week 1 Challenge

India Spice is an Indian restaurant. You have been contracted to design their website. You have been supplied with the following assets:

- logo.png - the restaurant's logo
- curry.png - a picture of one of their dishes
- spices.png - generic picture of Indian spices
- background.jpg - an optional background file
- video.mp4 - a video of the kitchen

For this challenge, create at least one page of the website with the following features:

1. The first page should be named index.html
2. Use reset.css at the top of the file
3. Include the restaurant's logo and name.
4. Use some Google fonts to improve the appearance.
5. Include a navigation bar
6. Use the supplied background image, or use a gradient as a background.
7. Embed the video using HTML5 video tags. Create a media fragment to play 30 seconds of the video. Set the video to preload the metadata and to autoplay muted.
8. Put the supplied images in two divs with some explanatory text. Use Flexbox to achieve the layout.

Optional: Use what you've learned to create a transform that happens when you hover over the div.

Try to use the techniques we've learned over the last week.

Have fun!
